

Introduction to 8085 MicroProcessor, 8085 Architecture - Part I

Course on Advanced Electronics - 8085 Micro Processors

bhima sankar monthina · Lesson 1 · Apr 7, 2021

Syllabus:

1. BASICS
2. Block Diagram Architecture of 8085 and Pin Diagram.
3. Machine Cycles of 8085.
4. Addressing Modes of 8085.
5. Instruction Set of 8085.
6. Programming.
7. Memory and I/O Interfacing to 8085.

Evolution of Processors :-

4004 → 4-bits → 1971, Processor

8008 } → 8-bit Processor → 1973
 8085 } → 8-bit Processor

8085 → 8-bit Processor → 1976

8086 → 16-bit
 80186 →
 Virtual memory { 80286 } → 32-bit
 386

8085

Intel Microprocess

Name	Year	Transistors	Clock speed	Data width
8080	1974	6,000	2 MHz	8 bits
8085	1976	6,500	3-5 MHz	8 bits
8086	1978	29,000	5 MHz	16 bits
8088	1979	29,000	5 MHz	8 bits
80286	1982	134,000	6 MHz	16 bits
80386	1985	275,000	16 MHz	32 bits
80486	1989	1,200,000	25 MHz	32 bits
Pentium	1993	3,100,000	60 MHz	32/64 bits
Pentium II	1997	7,500,000	233 MHz	64 bits
Pentium III	1999	9,500,000	450 MHz	64 bits
Pentium IV	2000	42,000,000	1.5 GHz	64 bits
Pentium IV "Prescott"	2004	125,000,000	3.6 GHz	64 bits
Intel Core 2	2006	291 million	3 GHz	64 bits
Pentium Dual Core	2007	167 million	2.93 GHz	64 bits
Intel 64 Nchalem	2009	781 million	3.33 GHz	64 bits

Basic Terminology

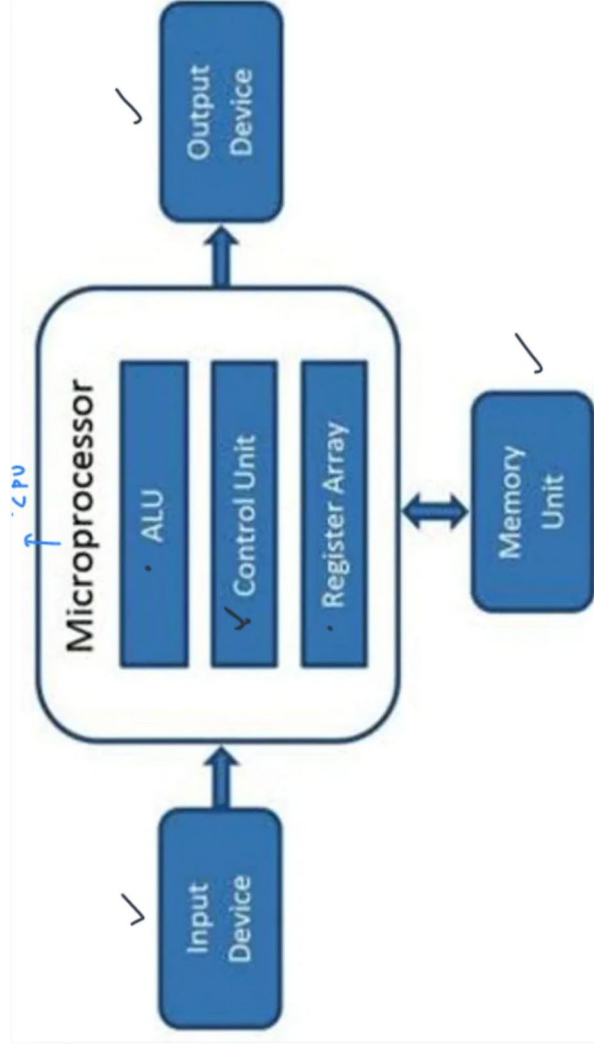

- Hard Ware →
- Soft Ware →
- Prog
- Instructions →

Manufacturer	Processor	Date of introduction	Number of transistors	Process	Area (mm ²)
Intel	Intel 4004	1971	2,300	10µm	12
	Intel 8008	1972	3,500	10µm	14
	Intel 8080	1974	4,200	9µm	20
	Intel 8085	1976	6,500	9µm	20
	Intel 8086	1978	29,000	3µm	33
	Intel 80286	1982	124,000	1.5µm	104
	Intel 80386	1985	275,000	1µm	173
	Intel 80486	1989	1,180,235	1µm	294
	Pentium	1993	3,100,000	0.8µm	307
	Pentium Pro	1995	5,500,000	0.6µm	395
	Pentium III	1999	7,500,000	0.35µm	128
	Pentium 4	2000	42,000,000	0.25µm	217
	Itanium 2 McKinley	2002	220,000,000	180nm	421
	Core 2 Duo	2006	291,000,000	65nm	143
	Core 2 Quad	2006	291,000,000	65nm	263
	Six-Core Core 17	2010	1,170,000,000	32nm	240
	Six-Core Core 17K Core Xeon ES	2011	2,270,000,000	32nm	434
	8-Core Itanium	2012	3,100,000,000	32nm	544
	Core i7	2008	731,000,000	29nm	80

- **Hardware:** Physical devices like Keyboard, Mouse, Printer etc.,
- **Software:** Set of Programs.
- **Program:** Set of Instructions.
- **Instruction:** It is a basic command to do a particular operation.

Block Diagram of Micro Computer

• CPU is the Heart of the computer.

It contains

- ALU ✓
 - Registers ✓
 - Control Unit. ✓
- } If all of them are Embedded in a single chip then it is called Microprocessor.
- Internal Bus.

The Central Processing Unit (CPU) consists of

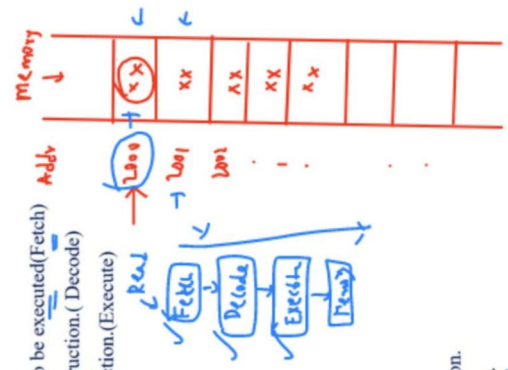

C.P.U

- (a) ALU and Control unit only
- (b) ALU, Control unit and Registers only
- (c) ALU, Control unit and System bus only
- (d) ALU, Control unit, Registers and Internal bus

In a Micro Processor all are embedded on a single chip.

The basic operations of CPU is

- To generate the address of next Instruction to be executed (Fetch)
- Read the Instruction and understand the Instruction. (Decode)
- Perform the operation required for the Instruction. (Execute)

I/O DEVICES

It will perform Arithmetic and logical operation.
 It provides temporary memory to store results.
 It will provide necessary control signals.

• Compiler (or) Interpreter is required to convert High Level Lang in to Machine Lang.

• Assembler is required to convert Assembly Lang to Machine Lang.

<p>Compiler</p> <p>Software that converts programs written in a <u>high level language</u> into <u>machine language</u></p> <p>Converts the whole high level language program to machine language at a <u>time</u></p> <p>Used by <u>C, C++</u></p>	<p>Interpreter</p> <p>Software that translates a high level language program into <u>machine language</u></p> <p>Converts the high level language program to machine language <u>line by line</u></p> <p>Used by <u>Ruby, Perl, Python, PHP</u></p>	<p>Assembler</p> <p>Software that converts programs written in <u>assembly language</u> into <u>machine language</u></p> <p>Converts assembly language program to machine language</p> <p>Used by assembly language</p>
--	--	--

<p>Interpreter</p> <p>Translates program one statement at a time.</p> <p>Interpreters usually take <u>less amount of time</u> to analyze the <u>source code</u>. However, the overall <u>execution time</u> is comparatively <u>slower</u> than <u>compilers</u>.</p> <p>No intermediate object code is generated, hence are memory efficient.</p> <p>Programming languages like JavaScript, Python, Ruby use interpreters.</p>	<p>Compiler</p> <p>Scans the entire program and <u>translates</u> it as a whole into <u>machine code</u>.</p> <p>Compilers usually take a <u>large amount of time</u> to analyze the <u>source code</u>. However, the overall <u>execution time</u> is comparatively <u>faster</u> than <u>interpreters</u>.</p> <p>Generates intermediate object code which further requires linking, hence requires more memory.</p> <p>Programming languages like C, C++, Java use compilers.</p>
--	---

8085 → Introduction

	Machine Lang	Assembly Lang	High Level Lang
Program Combs	1's & 0's	English like words called Mnemonics.	English Like Statements.
Writing prog	difficult	Slightly diff	Easy
Execution	Fast	medium	Relatively slow
Debug	Difficult	Slightly diff	Easy
Translator	NO	yes → Assembler (Manual)	yes → Compiler (Automatic) Interpreter
Problem dependent	Yes	Yes	No

8085 → 8-bit Technology

- 8-bit Processor
- clk frequency = 3MHz ($T = \frac{1}{3 \times 10^6} = 0.33 \mu s$)
- Power supply → 5V
- Addr Bus → 16-bit
- DATA Bus → 8-bit
- 40 pin IC
- 21 I/p
- 2 o/p

we can connect up to $2^{16} \times 8$ memory

2^{16} → Location

8-bit

64KB

memory handling capability.

2. 8085 M.P by SRIWATH

3. IIT MADRAS → NPTE & → PPF'S.

8085

40 PIN IC

27 OF PINS

21 I/P PINS

NMOS Technology

CLK freq = 3MHz

6500 Transistor

V_{CC} = 5

DATA Bus :- 8-bit

Addr Bus :- 16-bit

Bus Structure of 8085

1. DATA BUS

2. ADDR BUS

3. Control BUS

Bus :- A group of wires.

DATA Bus : The processor length and data handling capability of the processor is decided by its DATA bus size.

An N-bit processor contains n-bit data bus and its ALU is capable of performing n-bit operations at time.

8085 DATA BUS is 8-bit size, Bi-directional bus multiplexed with lower order address bus to save no of pins.
